

On the evening of August 28th and 29th

**Inorganic Electrochromic Materials and Devices**

P-1	<b>S. Burkhardt</b>	Concentration Dependent Diffusion of Hydrogen in WO <sub>3</sub> Thin Films Monitored by In-Situ Transmission Spectroscopy
P-2	<b>Y. Yokoiwa</b>	Metallic mode reactive sputtering of Ni oxide thin films and their electrochromic properties
P-3	<b>S. Cao</b>	Metal-doped TiO <sub>2</sub> Colloidal Nanocrystals with Broadly Tunable Plasmon Resonance Absorption
P-4	<b>C. Y. Jeong</b>	Electrochromic properties of rhodium oxide thin films prepared by reactive sputtering in O <sub>2</sub> or H <sub>2</sub> O atmosphere
P-5	<b>L. Wang</b>	Influence of Oxygen Partial Pressure on Electrochromic Performance of Vanadium Oxide (VO <sub>x</sub> ) Films for All-solid-state Complementary Electrochromic Devices
P-6	<b>H. Li</b>	Aqueous Metal Oxide Inks for Printable Electrochromics
P-7	<b>N. Li</b>	Crystallinity Dependent Electrochromic Properties in WO <sub>3</sub> Based Thin Films
P-8	<b>L. Niklaus</b>	Metallo-supramolecular polyelectrolytes and non-stoichiometric nickel oxide: Wet-chemical approaches towards flexible neutral-tint electrochromic devices
P-9	<b>Y. Zhen</b>	Electrochromic properties of WO <sub>3</sub> thin films: The role of film thickness
P-10	<b>X. Zhang</b>	Preparation of Monolayer Hollow Spherical Tungsten Oxide Films with Enhanced Near Infrared Electrochromic Performances
P-11	<b>I. Mjejri</b>	Electrochromic properties of V <sub>3</sub> O <sub>7</sub> .H <sub>2</sub> O Thick films
P-12	<b>A. Rougier</b>	Pseudocapacitive behavior of NiO thin films in various electrolytes
P-13	<b>C. Krzyszkowski</b>	Photodeposition of amorphous WO <sub>3</sub> on a flexible substrate
P-14	<b>S. Kimura</b>	Construction of Ag Deposition-based Electrochromic Device Utilizing Prussian Blue as Counter Reaction Material and Evaluate the Color Retention Characteristic
P-15	<b>T. Sugita</b>	Four chromatic color - magenta, cyan, yellow and green representation from silver deposition-based electrochromic device

On the evening of August 28th and 29th

### Organic Electrochromic Materials and Devices

P-16	<b>C. Kortz</b>	High Contrast Electrochromic Iris Utilizing Complementary Molecules on Nanoporous Electrodes
P-17	<b>M. Gicevicius</b>	Electrochromic Properties of a Polymeric Azobenzene-3,4-Ethylenedioxythiophene Semiconductor
P-18	<b>T.-Y. Wu</b>	Electrochromic performance of copolymer based on 2,5-di(thiophen-2-yl)thieno[3,2-b]thiophene and 2-(2-Thienyl)furan for electrochromic device
P-19	<b>T.-Y. Wu</b>	Electrosynthesis of copolymer based on bis-(4-( <i>N</i> -carbazolyl)phenyl)-phenylphosphine oxide and 3,3-dibenzyl-3,4-dihydro-2H-thieno[3,4-b]-[1,4]dioxepine for electrochromic device
P-20	<b>Y.-A. Lu</b>	Highly Stable Black-to-Transmissive Electrochromic Devices Composed of Phenolacetyl Viologen and 5,10-Dihydro-5,10-dimethylphenazine
P-21	<b>K.-I Chen</b>	Black-to-Transmissive Panchromatic Electrochromic Device based on Asymmetric Viologen with Anthraquinone and P-cyanophenyl Groups
P-22	<b>L.-Y. Hsiao</b>	N-Methylphenothiazine Derived Ionic Liquid as a Redox Couple with Co(II)-based Supramolecular Polymer for Electrochromic Device
P-23	<b>L. Qian</b>	Preparation and Electrochromic Properties of Polytriphenylamine Derivative with Pendent Ionic Liquid Unit
P-24	<b>X. Lv</b>	Enhanced Electrochromic Switching and Electrochemical Stability of Conjugated Polymers Utilizing Ionic Liquids
P-25	<b>G. K. Pande</b>	Counter Anion Effect on Electrochromic Properties of Alkylated and Perfluorinated Viologens in Ion Gel
P-26	<b>N. Kim</b>	Electrochromic Behaviors of Picene-containing Ion Gel in Single-layered Electrochromic Device
P-27	<b>J. Y. Jeong</b>	Alkylated quinoxaline-thiophene based donor-acceptor type conjugated polymers for electrochromic behaviors
P-28	<b>E. Shen</b>	Enhancing the Photostability of Electrochromic Polymers
P-29	<b>L. Zhang</b>	A flexible electrochromic skin with variable color and infrared emissivity based on polyaniline conducting polymer
P-30	<b>Z. Liang</b>	Multicolor organic electrochromic device having electrical double layer capacitive component
P-31	<b>A. Dupre-Demorsy</b>	Study on optical and electrochemical properties of two series of conducting copolymers

On the evening of August 28th and 29th**Hybrid and Composite Electrochromic Materials**

P-32	J. Wang	Prussian green films directly grown on FTO-coated glasses
P-33	N. Reddy	Preparation of Metal oxide/Conducting polymer Nano structured Composites for Electrochromic supercapacitor
P-34	Y. Shi	Novel Electrochromic-Fluorescent Bifunctional Devices Based on Aromatic Viologen Derivates
P-35	K. Shen	Highly Transparent Photoelectrochromic Device Based on Carbon Quantum Dots Sensitized Photoanode
P-36	C. Kortz	One-Dimensional Electrochromic Tunable Graduated Filters
P-37	B.-X. Wang	Practical Application of Viologen Dimer in Electrochromic Devices Utilizing Aryl-Substituted Viologen with Enhanced Stability
P-38	Y.-C. Wang	A Complementary Electrochromic Device Composed of Nanoparticulated Ruthenium Purple and Fe(II)-based Metallo-supramolecular Polymers
P-39	S.-M. Liou	The Influence of a Mediator on the Long-term Stability of a Poly(butyl viologen) Thin Film
P-40	Z.-Y. Xu	Electrochromic and Electrofluorochromic Devices from a Genetically Encoded Polymer
P-41	H. Q. Wong	Cyanotriphenylamine-based Polyimidothioethers as Multifunctional Materials
P-42	T. Hernandez	Electrolyte and Electrode Engineering for Durable Dynamic Windows based on Reversible Metal Electrodeposition
P-43	K. Kanazawa	Electroswitchable luminescence and coloration of Eu(III)-viologen TiO <sub>2</sub> modified electrode
P-44	M. Ciobanu	Electrochromic Hybrid Layers Based on Antimony Doped Tin Oxide and Triarylamine
P-45	T. Moreira	Fast switching and long lasting Electrochromic Devices based on semiconducting Copolymer/Carbon Nanotubes blends
P-46	S. Z. Karazhanov	PEDOT:PSS based Hybrid Electrochromic Devices

**Electrolytes and Transparent Conductors**

P-47	K. Yamada	Enhanced Electrochromic Properties of Poly(3,4-ethylene-dioxythiophene) Film on Au Nano-structured Electrodes
P-48	X. Diao	The influence of different transparent conductive materials (TCM) on the all-solid- state electrochromic thin film devices
P-49	Y. Watanabe	Analysis of the response characteristics of fast-response electrochromic porous electrode consisting of nanoparticles

**Thermochromic, Photochromic and other Chromogenic Materials**

P-50	<b>D. Liu</b>	Inkjet-Printed Films of Thermochromic Vanadium Dioxide Nanoparticles for Smart Window Application
P-51	<b>T.-C. Fang</b>	Direct printed stretchable thermochromic thin film devices
P-52	<b>S. Z. Karazhanov</b>	Photoluminescence Properties of Photochromic Oxidized Yttrium Hydride Films
P-53	<b>D. Moldarev</b>	Different Photochromic Phases of Yttrium Oxy-hydride
P-54	<b>M. Hočevár</b>	Photochromic multi-layered coatings on single glass
P-55	<b>P.-H. Aubert</b>	Active thermal control of satellites by Electro-Active Organic Coatings
P-56	<b>S. Dou</b>	Facile preparation of double-sided microstructure VO <sub>2</sub> (M) films with excellent thermochromic performances
P-57	<b>H. Kakiuchida</b>	Ellipsometry of Thermochromic Titanium-Vanadium Oxide Films at Various Temperatures
P-58	<b>X. Cao</b>	Tunable Optical Properties in VO <sub>2</sub> films with Localized Surface Plasmon Resonance Using Acid Etching Approach

**Device applications**

P-59	<b>M. Li</b>	Controllable Synthesis of Core-sheath Structured Aligned Carbon Nanotube/Inorganic Hybrid Films by Atomic Layer Deposition
P-60	<b>C.-W. Hu</b>	From Electrochromic Materials to Gasochromic Applications
P-61	<b>A. Ramanaviciene</b>	Electrochromic Sensor based on Polyaniline and Poly(3,4-ethylenedioxythiophene)
P-62	<b>K. Tajima</b>	Electrochromic device with WO <sub>3</sub> and Prussian blue nanoparticles fabricated by wet-process at room temperature
P-63	<b>Y. R. Lee</b>	Multiply Twisted Carbon Nanotube Fibers for Supercapacitor and Electrochemiluminescence Devices
P-64	<b>Y. Li</b>	Enhanced Electrochromism in Nanostructured Materials
P-65	<b>K. Nishizawa</b>	Simple and Low-temperature Chemical Fabrication of Pt-WO <sub>3</sub> Gasochromic Switchable Films
